

Lake Jindabyne Community Trail

Lake Jindabyne Trail

The Lake Jindabyne Community Trail is planned to link all community areas around Lake Jindabyne with either shared use trails or single track.

The Project has already seen several sections constructed to link Jindabyne and Tyrolean Village together. The trail will eventually traverse around the lake and provide numerous riding options depending on your fitness and skill level, with the easier trails being closer to community areas, then increasing in difficulty the further from these areas you get. The length of the trail will depend on where the trail can cross the Eucumbene, Snowy and Thredbo rivers. It is estimated that the trail will be longer than 75km and once constructed may provide over 100km of trail.
